BLACKFOOT M. D. COUNCIL HOLD COURT OF REVISION

A regular session of the council of the Municipal District of Blackfoot was held in the municipal office recently with Reeve Thorsen, Deputy Reeve Umbria and Councillors Belanger, Deschamps, Nelson and Wheatley present.

The minutes of the previous meeting were read and adopted on motion of Councilor Bolinger.

The secretary reported: That District Engineer Graham advised that a bridge west of 12-33-23-24 was desirable. The treasurer's bond confirmation certificate had been received from the Canadian Indemnity Co. S. A. Jensen tax seizure; further correspondence in this connection was read.

Mr. Jensen had also telephoned the office and talked with Reeve Thorsen. Road diversion north half 34-23-23, the preliminary agreement had not been completed.

Reeve Bolinger: That we sit in a Court of Revision and hear complaints against the 1932 triennial assessment.—Carried.

The C. P. R. complained against the assessment of 153 parcels of their owned lands and 12 parcels of contract lands, Mr. Hope, tax commissioner, appeared on behalf of the company stating that the assessment was 25 per cent in excess of the value of these lands at this time and for some time to come and requested a 25 per cent reduction against the prevailing assessments.

Coun. Wheatley: That for the revision of the assessment against lands included in the C. P. R. complaint bearing a fair and equitable value as compared to adjoining and other lands within this municipality, the said complaint be disallowed.—Carried.

M. Bolinger complained against assessment of north of the railway north-west 7-22-22 as per section 8-22-22. Assessment was discussed. All concerned mutually agreed to that amount being taken up later by the court.

Coun. Wheatley: That the survey ascertain the areas taken for irrigation easement from north of the railway northwest 7-22-22 and adjust the assessment in proportion to the acreage in dispute.—Carried.

M. Bolinger complained against the assessment against north of the railway section 8-22-22. Assessment was discussed. All concerned mutually agreed to that amount being taken up later by the court.

C. F. Bennett complained against assessment of south of the canal north-west 7-22-22. Mr. Bennett claimed assessment out of all proportion to actual value of land.

Coun. Nelson: That the assessment against south-west of canal section 8-22-22 be reduced \$100 to bring it in line with adjoining lands.—Carried.

Carl Sonnen complained against assessment of N. W. 29, S. E. 31, N. E. 30 and S. W. 31-22-23. Mr. Sonnen was present and described the lands as compared with other lands. He especially stressed that a portion of the N. W. 29 was the very poorest.

Coun. Deschamps: That the assessment against the 85.7 acres upon the N. W. 29-22-22 be reduced.

Coun. Nelson: That the complaint against the 85.7 acres upon the N. W. 29-22-22 be dismissed. The relative values of lands adjoining lands are equal.—Carried.

L. Selegmen complained against assessment S. W. 17-22-22. Mr. J. B. Deschamps represented Mr. Selegmen. Complainant that 70 acres

were useless on account of sewage.

Coun. Nelson moved and carried that the assessment against the S. W. 17-22-22 be allowed to stand.

C. S. Chase complained against assessment of section 18-22-21. Councillor Nelson knew this land and checked each parcel on behalf of Mr. Chase.

Coun. Umbrich: That the assessment against the S. E. 18-22-21 be reduced \$100 and the assessment against the north half and S. W. of said section remain the same.—Carried.

Donald Engwall complained against assessment on N. W. 29-22-21. The court made comparisons with neighboring assessments. Mr. Engwall was not present or represented.

Coun. Thorsen moved and carried that the assessment against the property stand.

D. E. England complained again assessment of S. E. 32-22-23. Mr. England was not present or represented. Court made comparisons against neighboring assessments.

The assessment against this property was allowed to stand on motion of Coun. Nelson.

Harvey Hansen complained against south half of N. E. 31-22-23. Mr. Hansen was not present or represented. Court made complaint was overruled.

Coun. Umbrich: That the assessment against the 85.7 acres upon the N. W. 29-22-22 be reduced.

Coun. Wheatley: That the assessment against the 85.7 acres upon the N. W. 29-22-22 be reduced.

C. P. R. complained against the assessment of 153 parcels of their owned lands and 12 parcels of contract lands, Mr. Hope, tax commissioner, appeared on behalf of the company stating that the assessment was 25 per cent in excess of the value of these lands at this time and for some time to come and requested a 25 per cent reduction against the prevailing assessments.

Coun. Umbrich: That the assessment against lands included in the C. P. R. complaint bearing a fair and equitable value as compared to adjoining and other lands within this municipality, the said complaint be disallowed.—Carried.

Mrs. N. Bousche complained against N.W. 2 and 11-22-22, appealed by Claude Roache. Neither parties were present or represented. Complaints listed in appeal. The assessment was reduced by \$100 and a reduction of 25 per cent land a reduction of \$150.00. The court made comparison against the N. E. 33 remain the same.—Carried.

Mrs. N. Bousche complained against N.W. 2 and 11-22-22, appealed by Claude Roache. Neither parties were present or represented. Complaints listed in appeal. The assessment was reduced by \$100 and a reduction of 25 per cent land a reduction of \$150.00. The court made comparison against the N. E. 33 remain the same.—Carried.

Coun. Umbrich: That the assessment against the N. W. 2, 32-22-23 be adjusted by changing classification of 10 acres from 85 per cent to 25 per cent land a reduction of \$150.00. The court made comparison against the N. E. 33 remain the same.—Carried.

Coun. Umbrich: That the assessment against the N. W. 2, 32-22-23, appealed by Claude Roache. Neither parties were present or represented. Complaints listed in appeal. The assessment was reduced by \$100 and a reduction of 25 per cent land a reduction of \$150.00. The court made comparison against the N. E. 33 remain the same.—Carried.

Coun. Umbrich: That the assessment against the N. W. 2, 32-22-23, appealed by Claude Roache. Neither parties were present or represented. Complaints listed in appeal. The assessment was reduced by \$100 and a reduction of 25 per cent land a reduction of \$150.00. The court made comparison against the N. E. 33 remain the same.—Carried.

Coun. Umbrich: That the assessment against the N. W. 2, 32-22-23, appealed by Claude Roache. Neither parties were present or represented. Complaints listed in appeal. The assessment was reduced by \$100 and a reduction of 25 per cent land a reduction of \$150.00. The court made comparison against the N. E. 33 remain the same.—Carried.

Coun. Umbrich: That the assessment against the N. W. 2, 32-22-23, appealed by Claude Roache. Neither parties were present or represented. Complaints listed in appeal. The assessment was reduced by \$100 and a reduction of 25 per cent land a reduction of \$150.00. The court made comparison against the N. E. 33 remain the same.—Carried.

Coun. Umbrich: That the assessment against the N. W. 2, 32-22-23, appealed by Claude Roache. Neither parties were present or represented. Complaints listed in appeal. The assessment was reduced by \$100 and a reduction of 25 per cent land a reduction of \$150.00. The court made comparison against the N. E. 33 remain the same.—Carried.

Coun. Umbrich: That the assessment against the N. W. 2, 32-22-23, appealed by Claude Roache. Neither parties were present or represented. Complaints listed in appeal. The assessment was reduced by \$100 and a reduction of 25 per cent land a reduction of \$150.00. The court made comparison against the N. E. 33 remain the same.—Carried.

Coun. Umbrich: That the assessment against the N. W. 2, 32-22-23, appealed by Claude Roache. Neither parties were present or represented. Complaints listed in appeal. The assessment was reduced by \$100 and a reduction of 25 per cent land a reduction of \$150.00. The court made comparison against the N. E. 33 remain the same.—Carried.

Coun. Umbrich: That the assessment against the N. W. 2, 32-22-23, appealed by Claude Roache. Neither parties were present or represented. Complaints listed in appeal. The assessment was reduced by \$100 and a reduction of 25 per cent land a reduction of \$150.00. The court made comparison against the N. E. 33 remain the same.—Carried.

Coun. Umbrich: That the assessment against the N. W. 2, 32-22-23, appealed by Claude Roache. Neither parties were present or represented. Complaints listed in appeal. The assessment was reduced by \$100 and a reduction of 25 per cent land a reduction of \$150.00. The court made comparison against the N. E. 33 remain the same.—Carried.

Coun. Umbrich: That the assessment against the N. W. 2, 32-22-23, appealed by Claude Roache. Neither parties were present or represented. Complaints listed in appeal. The assessment was reduced by \$100 and a reduction of 25 per cent land a reduction of \$150.00. The court made comparison against the N. E. 33 remain the same.—Carried.

Coun. Umbrich: That the assessment against the N. W. 2, 32-22-23, appealed by Claude Roache. Neither parties were present or represented. Complaints listed in appeal. The assessment was reduced by \$100 and a reduction of 25 per cent land a reduction of \$150.00. The court made comparison against the N. E. 33 remain the same.—Carried.

Coun. Umbrich: That the assessment against the N. W. 2, 32-22-23, appealed by Claude Roache. Neither parties were present or represented. Complaints listed in appeal. The assessment was reduced by \$100 and a reduction of 25 per cent land a reduction of \$150.00. The court made comparison against the N. E. 33 remain the same.—Carried.

Coun. Umbrich: That the assessment against the N. W. 2, 32-22-23, appealed by Claude Roache. Neither parties were present or represented. Complaints listed in appeal. The assessment was reduced by \$100 and a reduction of 25 per cent land a reduction of \$150.00. The court made comparison against the N. E. 33 remain the same.—Carried.

Coun. Umbrich: That the assessment against the N. W. 2, 32-22-23, appealed by Claude Roache. Neither parties were present or represented. Complaints listed in appeal. The assessment was reduced by \$100 and a reduction of 25 per cent land a reduction of \$150.00. The court made comparison against the N. E. 33 remain the same.—Carried.

Coun. Umbrich: That the assessment against the N. W. 2, 32-22-23, appealed by Claude Roache. Neither parties were present or represented. Complaints listed in appeal. The assessment was reduced by \$100 and a reduction of 25 per cent land a reduction of \$150.00. The court made comparison against the N. E. 33 remain the same.—Carried.

Coun. Umbrich: That the assessment against the N. W. 2, 32-22-23, appealed by Claude Roache. Neither parties were present or represented. Complaints listed in appeal. MANY PEOPLE ATTEND U. F. W. A. DANCE FRIDAY

The dance and templa put on by the members of the U. F. W. A. Gleichen branch, at the Meadows Hall, last Friday night proved to be a success. There were over 200 people, who came from all parts of the country, were much larger than anticipated. However, the ladies were equal to the occasion and attended to the wants of the crowd admirably.

Donald Engwall complained

ANNUAL MEETING BOARD OF TRADE ELECT OFFICERS

The annual meeting of the Gleichen Board of Trade was held in the form of the usual luncheon in S. E. Cook's restaurant, Saturday afternoon, January 16th. The minutes of the last regular meeting were read and adopted resulting in considerable discussion.

The financial condition of the power lines in the district was widely discussed and a special committee was appointed to see that Black and McQueen was appointed to investigate the possibility of having same repaired.

Just before supper drawing for the quilt took place which resulted in Johnnie Plastic being the lucky winner. The quilt was made by Mrs. L. G. Garland and the tickets for the remainder of the prizes were given by the local Boy Scout organization.

Johnnie Plastic, who had won the quilt, was given a special vote of thanks for his services.

After supper dancing was resumed.

At midnight supper was served to the huge crowd in the basement dancing room and the doublets at the front were thrown open through which the people began to leave. A pair of hands thrown the pipe upon end to the excitement. Little if any damage was done.

At 12 o'clock the doors were closed for the year 1933.

President, N. T. Purcell.

Vice-Pres., L. Michael.

Sec-Treas., W. Stuermer.

Nominating Committee, Goo. Goodwin and L. Michael.

Membership Committee, M. Brown and W. Stuermer.

The slate of officers for all other committees will be drawn at the next meeting.

It was also agreed that the usual fifteen minute speeches held at regular meetings be deferred to 1933.

Adj. Subber and the Salvation Army Eventide Home were invited to speak at the next meeting.

The annual meeting of the board was left in the hands of the president.

The next meeting will be held in the home of Mrs. L. Jeffers on Thursday, January 19th.

CARD OF THANKS

We wish to extend our heartfelt thanks to all our kind friends who so generously offered their help during the time of the sudden great loss of our dear mother who passed away on January 3rd. Our thanks goes out to those who offered services at the funeral, played on organ and especially to those six gentlemen whose names were omitted last week.

The pallbearers, namely Mr. T. Baillie, Mr. L. Michael, Mr. T. A. Thorson, Mr. H. Scott, Mr. Duncan McLean and Mr. H. Hamar.

MR. SANDERS and FAMILY.

CLUNY PLAYERS MAKE HIT WITH NEW PLAY

On Monday evening the Cluny players gave a performance in their town hall. And greeting that amateur plays take best at home the whole performance was far above the average. Even a hockey game produces more enthusiastic audience than does a play when the play closed. The plot is excellent, the humor most provocative and the acting better.

George is about to fall heir to a fortune, finds himself a \$500 debt and is term in jail. But his guardian Jim Grey, a notorious swindler, has been released and the boy is free. George's wife, Mrs. Grey, is a "get-rich-quickly" family.

Shortly after, George is given a special vote of thanks for his services.

On Tuesday evening the play was repeated for the year 1933.

President, N. T. Purcell.

Vice-Pres., L. Michael.

Sec-Treas., W. Stuermer.

Nominating Committee, Goo. Goodwin and L. Michael.

Membership Committee, M. Brown and W. Stuermer.

The slate of officers for all other committees will be drawn at the next meeting.

It was also agreed that the usual fifteen minute speeches be deferred to 1933.

Adj. Subber and the Salvation Army Eventide Home were invited to speak at the next meeting.

The annual meeting of the board was left in the hands of the president.

The next meeting will be held in the home of Mrs. L. Jeffers on Thursday, January 19th.

Britain Leads The Way.

Because of its importance as an essential factor in the economic and financial recovery of Britain, and because of the responsibilities which it entails, we must be resolute in our efforts to keep war debts as low as possible. We offer no apology for again making the international war debts the subject of discussion in this column. Such discussion, if it is to be at all helpful, must, however, be conducted in a fair manner, arguments advanced must be based in justice and on reason, and nothing of a nature to provoke ill-feeling or prejudice indulged in. The whole object of such discussions should be to present facts, frankly outline and explain the actual position, and thereby seek to bring people together in a spirit of frankness, mutual understanding and sympathy. The position of each side is taken into account, but in effecting re-adjustments which will prove beneficial to all.

First of all, let us again refer to the contention advanced by the Montréal newspaper previously quoted by us, which presented the viewpoint of many people in that country that it was passing strange that Great Britain, while finding it difficult in fact now impossible to repay its debt to the United States in gold, was still able to devote 160 millions of dollars annually to military purposes.

We are now proceeding to analyse such payments in order to establish what portion of them is accounted for by pensions, hospitalisation and other care of living disabled soldiers and sailors, and other payments which have to do with what is past and not as preparation for the future, we would present certain facts in support of our former statement that "Great Britain has reduced her military expenditures to a greater extent than any other country; that with a world-exceeding Empire she is spending less not only proportionately but actually, than the United States, much less than Canada, and that she is the foremost advocate of disarmament in the world today."

Great Britain does not maintain a large army and never has done so. At the outbreak of the Great War it was so small that Germany looked at it with contempt. Such as it was, it was scattered all over the world, with the major strength in India, and units located at Gibraltar, Malta, Egypt, China, along lines of Empire communication. It was not an army of offence, but solely for defence; in a word, a needed force for the Empire.

The British army is smaller today than before the war, and smaller than the army of the United States, almost insignificant compared with the standing armies of European countries.

British chief expenditures have been on its navy, and that navy was likewise a defensive machine for a sea-surrounded country with Dominions, colonies and protectorates located in all parts of the globe. It was designed and created to protect the sea-borne commerce of the Empire in time of war, whether it was involved in such wars as had to be fought, or world policies in time of peace to protect the British subjects and their people in all parts of the world where revolution or disaster might occur.

Bearing these facts in mind, and the further fact that the British Empire is not smaller because of the Great War, but larger, and its responsibilities toward backward peoples greater than ever before, let us ponder for a moment what Britain has done to lessen military, or war, expenditures and to promote disarmament throughout the world.

In the British Fleet of Commerce, the First Fleet of the Admiralty, the Royal Navy, the Royal Indian Marine, the Royal British Air Force, the most magnificent fleet in the world," his quoted figures to support his assertion. In 1914 Britain had 69 battleships; by 1938, when the next conference on naval strength fails due, Britain will have only 15 battleships. Britain's cruiser strength in 1914 was 108; by 1938 it will be 50. Of destroyers Britain, in 1914, possessed 285; in 1938 the number will be 117. In submarines Britain in 1914 had 74; by 1938 we will have only 58.

Now let us compare total naval tonnage of Great Britain, United States, France and Japan as it was in 1914, and as it will be when the next naval conference meets in 1938. Here are the figures:

	1914	1938	Increase or Decrease
Great Britain	210,000	1,151,000	47% Increase
United States	83,000	1,139,000	25% Increase
France	74,000	500,000	35% Decrease
Japan	52,000	720,000	37% Increase

Thus, Britain has the world's largest naval force. Its next, which is to say, is to maintain a sufficient naval force, both to defend its navy, upon which at any moment the very food supplies of the British people may depend, and upon which thousands of British subjects in odd corners of the world have to rely in time of trouble, has been reduced by almost one-half. Can Britain with safety go farther until other nations display a willingness to follow her example?

Even the figures given do not tell the whole story. Britain relies on citizens to do their share of work to support her fighting colonies and protectorates. The total amount of money estimated to be about 20 years' value of Britain's colonies are already over that age, and by 1938 no less than 18 is out of the total of 50 will be out-of-date.

France, like Britain, shows a decrease in total tonnage, but in 1914 very many ships in the French navy were of practical no fighting value, while today the French fleet is very much up-to-date.

At the present time Britain's naval cruiser force, under command of what is known as the British Cruiser Squadron, is sent to various parts of the world, at all times of necessity, and the British Admiralty now finds the greatest difficulty in answering such demands. We again ask, should Britain go farther, scrap more ships, allow such demands for assistance to go unheeded, and remove from a still unsettled world that protection which it has been the pride and glory of the British navy. It has always provided when the call comes?

No, Britain is leading the way in disarmament, just as it is in relation to problems calling for solution. It is now up to those who professedly approve of her policy to follow that leadership and give a helping hand.

Elevators which travel up and down in a curved are being built, often having sufficient funds on deposit, as ascent around the bulging sides of the bank has just been made a crime in naval dignitaries.

To draw a check on a bank with a bank having sufficient funds on deposit, as ascent around the bulging sides of the bank has just been made a crime in naval dignitaries.

Pains Around Her Heart

Tired Out After Doing Housework

Miss Milburn's Heart and Nerve Pills were good for these troubles I send a box, and after taking the pills for a few days I feel well again. But, doctor, I would like to return of the dizzy spells and pains around the heart."

Seeing that Milburn's Heart and Nerve Pills were good for these troubles I send a box, and after taking the pills for a few days I feel well again. But, doctor, I would like to return of the dizzy spells and pains around the heart."

One pound of pure raw silk can be woven into 100 yards of silk cloth.

Helping the Poor

Eight cents goes pay for a medical consultation and treatment and a bottle of medicine in the poor districts in Liverpool, England, where three experienced doctors carry on the work of the cheap dispensaries.

"Whether you are," says an article, "you can always and your way by noting the position of the mass on the trunk—Forest Service, Department of the Interior, Canada.

One theory of the origin of the Eskimos is that he is descended from the Indian of North America.

Incapacity for work caused by rheumatism cost Britain \$100,000,000 in 1932.

Work Nearly Completed

Mishaps Delayed Completing Up Chancel To St. John Barber

For two years men have been engaged in removing ledges on the eastern side of Partridge Head and in straightening, as a consequence, the main channel leading into Saint John Harbour. Much work, however, the work has been completed.

The history of the undertaking dates back to the spring of 1929, when the S.S. Duchess of Richmond ran aground on the island. It was before daybreak, thick fog prevailed, and the ship had not acquired sufficient speed to cover the distance in a strong tide. At the subsequent session of the Dominion Parliament, \$100,000 was voted for the channel development.

Work was delayed briefly by two reasons. In October of last year the dredge developed a fault and an anchor punctured the hull. The crew scrambled to safety aboard a tug.

Latter, a rock breaker purchased at Halifax same of Nova Scotia while being towed to Saint John. Another rock breaker is engaged in the work of removing the remaining two dredges, including the "Leonidas," which was salvaged and repaired.

The ledges are being reduced to a minimum of 30 feet below the surface at low water.

A Master Surgeon

Mother Of Three Children Entombed Alive By Her Work

A mother of three children has been awarded the degree of Master of Surgery—one of the highest medical honours. She is Mrs. Phillips Parry Martin, ophthalmic surgeon at the Elizabeth Garrett Anderson Hospital for Women, and she is the only woman to have passed for this degree and part of F.R.C.S. at the first attempt.

"Surgery is one of the finest frontiers for women," she said when interviewed. "It brings out the human side of women and makes her a better person. She believes that a woman cannot work and run house, and the home is happier for it." Mrs. Martin's three small daughters all intend to become doctors. Mrs. Martin is the wife of E. K. Martin, another Master of Surgery.

Canada's Trade

How Total Of Exports Has Increased During Last Century

A century ago Canada was a group of separate colonies with a population of slightly over 1,960,000 the rate of exports was \$35 per person, and the total population of 1,960,000 the ratio of exports to population was 18¢ per person. These, and other enlightening statistics were given by Hon. H. E. Stevens, Minister of Trade and Commerce, in a short talk on "Canada's Rise in the World of Commerce." It was given to the members of the Professional Institute of the Civil Service of Canada.

Sought Safe Route

Man Taking Giraffe To Liverpool Had His Troubles

A man called at the London head-quarters of the Automobile Association to enquire the height of all the bridges over roads between London and Liverpool.

"I have to take a giraffe up to Liverpool by road," he said, "and its neck is so long that its head is 20 feet above the ground. I want to know if there are any bridges over all the roads between London and Liverpool without bending its neck—and it does not know where to do that!"

A safe route was found.

Saved By Pages

Story From Chicago Pages Popular It Is Short Lived

There is a touch of pathos as well as considerable food for thought, in a story from Chicago to the effect that at an auction sale seven autographed photographs of famous people were sold for 10¢ each only. \$1 for the lot. In their day, though, it delighted great audiences, the thrill of genuine enthusiasm aplause, and reviled in general popularity. Then the possessors of one of these autographed photographs was regarded as fortunate! Today it is not even a complete oxymoron to say that it will not cost more than 42 cents—Tit-Bits.

CLEANING HISTORIC FIGURES

Honored By France

Woman Received Medals For Polit. After War

For the work she did after the war in aiding plastic surgeons in restoring the mutilated faces of French polly by creating life-lasting "portrait masks." Mrs. Anna Colman Ladd, Boston sculptor, has been awarded the Cross of the Chevalier of the Legion of Honour.

"The method I used for my portrait masks," said Mrs. Ladd, "was technically this: A mask of the mutilated face was made. Then, working from photographs, or verbal descriptions, I would build up the missing tissue with a special paste and expression in the plaster cast. From this a gauze mesh was hung in a copper bath for two days. The thin copper sheeting was then silvered and painted with a special enamel that would match the skin tone of the patient as nearly as possible. If the wound was deep, the mesh was lined with false skin.

Somehow success has attended the first tentative experiments in cloning the famous wax figures in Westminster Abbey. These figures have rested in their glass cases for centuries and some experts predicted that they would fall to dust if removed from their sealed boxes, but the wax models have survived.

They are now to be cleaned and repainted, and the gauze mesh removed. The ladies will be surprised to learn that under her fine brocade Queen Anne is wearing a leather petticoat.

"Bricks" Of Oxygen

Discovery Will Lead to Saving Of Countless Lives

An extraordinary discovery is announced from Germany, where a method has been found of solidifying oxygen into small "bricks" and of so doing the solid gas that it can be carried in with safety in ordinary containers. These bricks are now used as constituents at a pressure of hundreds of pounds to prevent for years without deterioration.

Despite the terrible pressure used to solidify the gas, there is no danger as long as these oxygen bricks, which cannot explode. Each of them, though, contains as much gas as a dozen kilos of the great steel cylinders.

The oxygen can be kept for use in the first solo woman's flight across the Atlantic, landing at Londonderry in May.

In July, Mrs. Gossou flew from east to west, starting from Ireland and landing at Pembridge, near Saint Asaph, Wales.

August 1st, Mrs. A. Molson made the first solo Atlantic flight from east to west, starting from Ireland and landing at Penrhyn Ridge, near Saint Asaph, Wales.

September 1st, Mrs. A. Molson made a second solo flight to Australia before she was married.

Mrs. Molson, now Miss Amy Johnson, who made a spectacular flight to Australia before she was married, lowered her husband's record for a Croydon-Cape Town flight, flying a similar machine.

Outstanding Flights

Four Most Spectacular Were Made Last Year

Mrs. Putnam, nee Amelia Earhart, made the first solo woman's flight across the Atlantic, landing at Londonderry in May.

In July, Mrs. Gossou flew from east to west, starting from Ireland and landing at Pembridge, near Saint Asaph, Wales.

August 1st, Mrs. A. Molson made the first solo Atlantic flight from east to west, starting from Ireland and landing at Penrhyn Ridge, near Saint Asaph, Wales.

September 1st, Mrs. A. Molson made a second solo flight to Australia before she was married.

The one "thank you" came from an elderly man and his daughter on a Christmas eve after they had left the train campaign. Sabin recalls that trip had been made through a blinding snow storm, and his daughter walked in the face of the storm toward the cab to thank him for carrying them safely to their destination.

French Cafes In Tree

Reached By Winding Staircase Built Around Tree

In the branches of a tall chestnut tree at Steeple, near Paris, France, a restaurant-cafe has been opened. Resting on the branches are the supporting arms of a winding staircase built around the trunk of the tree: The food is conveyed from the ground in baskets attached to ropes.

Bulbs Cheap Plane

Engineer Roy Melling has brought out an aeroplane which along the lines of the design of the "Biplane" will fly 200 miles an hour. It will sell soon for \$250. It is equipped with an air-cooled twelve-cylinder engine, can attain a speed of 60 miles an hour, and was licensed by police after demonstration flights at Koenigsberg, Russia.

An old Cleveland ordnance makes it possible to drop the bomb along a straight line. The "Biplane" is a biplane, has a top speed of 200 miles an hour, and is expected to be very popular.

High Flights

Experiments Show Life Impossible Above 59,000 Feet

Only pilots can soar with safety into untold heights.

Important messages recently carried by Sir Leonard Hill, director of research at the London Light and Electrical Clinic, show that there are definite limits to which man can ascend and live.

In conversation with a reporter, he gave the following safety limits:

Airmen and climbers breathing the surrounding air at 20,000 feet (about 3 1/2 miles).

Almen breathings supplies of oxygen—59,000 feet (about 9 1/2 miles).

In both these cases it is assumed that the subjects are exposed to the surrounding air pressures. In the case of Sir Leonard's press card recently, the ascent is made in some form of sealed container where pressure and oxygen supply can be maintained at normal levels, the height which can be attained is limited only by the ascending power of the space capsule.

The greatest height so far attained by an airman was that attained recently over the Severn Valley by Captain Uwins, who flew to 44,000 feet with the help of oxygen supplies from an electrical device made by Professor Pitcairn, while in his sealed container was 53,072 feet.

Sir Leonard Hill is of opinion that no living thing as we know it can exist indefinitely above 28,000 feet, and that the summit of Mount Everest (29,000 feet) is therefore completely impossible.

In the course of his experiments Sir Leonard watched the effect of emptying a steel chamber filled with oxygen in which animals had been placed. Their behaviour was observed through a glass window.

A monkey was seen to drop in the direction of the oxygen when roughly one-sixth of that of air at the earth's surface; a post began to die in a one-seventh density; mice and other small animals were more enduring.

Drowsiness was in every case the first warning of danger. With increasing rarity signs of exhaustion did not appear until the action of the body to appear, whereupon in all cases oxygen was restored to the chamber and the animals completely recovered.

System Takes Time**Telephone Operators In Trouble Of Quebec**

They can't speak French and the other person can't speak English don't be disheartened, for the province of Quebec telephone operators can right matters. To remove the language barrier on cut-of-town calls, the first step is to tell the operator what you wish to ask the other person—and then wait and upon receiving the answer translate it back to you. The system takes time, but satisfaction results.

Workers Read "Dead Books"

More "dead books" are borrowed by stenographers, waiters, factory workers and clerks than by their bosses. These "dead"—that is, books of all kinds—are inclined to focus on adventure stories. That's what Charles H. Compton, assistant librarian of the St. Louis public library, says.

Tired And Irritable?

Take Lydia E. Pinkham's Vegetable Compound

It satisfies the nerves and helps to build you up. You will feel better... sleep better... look better. Life will seem worth living again. Lydia E. Pinkham's Vegetable Compound is the choice of 160 women say, "It helps me." Let it help you too. Liquid or tablet form, as you prefer.

Heavy Gold Shipment

Early In War \$36,000,000 Taken From Vancouver To Ottawa

Britain's debt to the United States reached \$36,000,000 last month to change hands at one time, and it is but that there are men in Montreal who can remember a larger gold movement than that, and a longer one too.

It was during the early years of the war, according to J. R. McNeil, manager of the Canadian department of the Canadian Express. The then Dominion Express was given an order to move \$36,000,000 from Vancouver to the Royal Mint vaults at Ottawa. There were 13 cars on the bullet train, nine of them held gold and four cars held silver. The others were carrying safe carrying, rating guards and officials. The whole trip was made in 90 hours, with stops only to change engines.

The train was given precedence over everything else on the Canadian Pacific Railway. With men riding on the cow-carts, the train, in the course of its long journey, it was probably this train that started the rumor that a Russian army corps had been transported across the Dominion.

There were succeeding heavy gold shipments, one of \$68,000,000, and many ranging between \$10,000,000 and \$20,000,000. All told, during the war something between \$125,000,000 and \$150,000,000 was moved, Mr. Martin said.

Boon To the Blind**Investor Working On Idea For Books That Talk**

Books that talk for the blind are not beyond the realm of possibility, according to Glenn E. Watson, Detroit inventor.

Watson, who demonstrated radio typewriting two years ago, is developing a plan whereby the light waves of a typewriter may be translated into radio waves for transmission into radio sets.

The plan, he said, could be worked out something like movie film carries talking reproduction powers.

Pointing to the benefits of his plan as it developed, the inventor said a blind man has little choice in his reading.

"Everything he reads," Watson said, "is consumed by the publisher of Braille books. He can't read the newspapers. He has to go to a library for Braille books every time he wants to read."

The inventor has completed a rough model of his talking book.

Discover New Star**Has Been Sought By Astronomers For 513 Years**

Out in space a gigantic pin wheel of two balls of fire as big as 24 suns has been discovered. It is whirling at about 100 miles per second in the sky only about as wide as a fifth of the distance between sun and earth.

The results of 312 years' observations which have proved the existence of this fireworks monster were reported to the American Association for the Advancement of Science by Prof. Raymond E. Dugay of Princeton University.

The pinwheel is the star SX Cassiopeiae, so distant that even in a telescope it is just a pin point of light to a man's eyes. This star is really twins, one whirling about the other, one sixteen times the sun's diameter, and the other eight times.

Canada's Trade Position Good**Toronto Globe Says Dominion Goods With Courage**

Canada faces the future with courage and in a solid national position. The world's largest market, financial and trade survey, Canada has met all her financial obligations, has no war debts except to her own people and leads the world in production of primary, mineral and agricultural products.

Canada holds second place in world production of gold, platinum and cobalt, third in production of wheat and fourth in production of marmalades, copper and lead, the review continued.

Celephone Wrapped Grapes

Today grapes red and purple today grapes are sold in Canada and go to eastern markets this winter wrapped in cellulose. Wrapping the bunches in cellulose heightened the color of the grapes as serves as a preservative.

Grieada extended from the British Columbia interior and are expected to make possible the completion of the Cawston-Shankow railway line in China.

HER FAT WAS A BURDEN**Now She Is Quite Slender**

Here is another case where the trim slim figure of young girls displayed in the windows of department stores is a housekeeper writing. She says: "I cannot say when weight I was, but I am very fat—I came to my self to have the benefit of Kruschen Salts and now I am quite slender. I am 50 years old and people take notice of me more than of myself. You can take it from me that every word of this is true. I have lost 100 pounds since I began to eat Kruschen Salts. They are delicious, taste good, they stay with your weight in gold."—(Mrs.) A. H.

In general, wealthy overweight people have been visiting those European Spas whose waters are recognized for their medicinal value. The formula of Kruschen represents the ingredients of the natural water of the famous German Spas. These Spas combat the cause of fat by assisting the internal organs to expel—to throw off each day these waste products and poisons which, if allowed to accumulate, will be contrary to the body's customary fat-free tissue.

Hobby Proves Valuable**Ottawa Airman Makes Living Out Of Talent For Whistling**

Things looked bad for the blind, are not beyond the realm of possibility, according to Glenn E. Watson, Detroit inventor.

Watson, who demonstrated radio typewriting two years ago, is developing a plan whereby the light waves of a typewriter may be translated into radio waves for transmission into radio sets.

The plan, he said, could be worked out something like movie film carries talking reproduction powers.

Pointing to the benefits of his plan as it developed, the inventor said a blind man has little choice in his reading.

"Everything he reads," Watson said, "is consumed by the publisher of Braille books. He can't read the newspapers. He has to go to a library for Braille books every time he wants to read."

The inventor has completed a rough model of his talking book.

Vatican Prizes Old Atlas**Ancient Greek Maps One Of Treasures Found Possessed By Vatican Library**

After thirty years' work, which has been done by the Society of Jesus, has been superannuated, the Vatican Library has published a magnificent reproduction of the oldest atlas of western geography. It is a faithful reproduction of the Greek Codex by Claude Tolosanus.

The collection, which dates from the 11th or 12th century of our era, is one of the most treasured possessions of the Vatican Library.

The atlas is bound up in four volumes, the first containing photographic reproductions of the most ancient maps.

Observed Old Custom**Parishes At Knightlow Cross, Eng., Land Pay Silver At Dawn**

Just before sunrise the annual ceremony of collecting wroth silver payable to the Duke of Bedford and Queenbury was observed at Knightlow Cross, Charnwood, recently. The wroth payable to the Duke of Bedford was "collected" and their representatives placed their contributions in a hollow in the top of an ancient stone, amounts ranging from two cents to 55 cents.

Taking No Chance

He was very hungry so he pushed through the rest of the restaurant and sat down. It was a rough, unsmiling place but he thought he would try a cup of coffee and something to eat. The waitress brought coffee in a thick, heavy cup. "Where's the saucer?" inquired our fastidious friend. "I don't care," he answered. "It's all right."—(Mrs.) E. W.

Some ill-bred ignoramus would drink out of his saucer, and we'd lose a lot of our swellest customers."

One of the most extensive natural basins of the earth is the Hudson Bay basin of Canada with an area of 1,500,000 square miles.

China's 1932 rice crop was the largest in several years.

Steel products in Britain expect an early business improvement.

London has an ice-skating craze.

Great Slave Lake**Second Largest Lake Lying Entirely In Canadian Territory**

Lying in the district of Mackenzie in the North West Territories it is the second lake with an area of 11,170 square miles. It is the second largest lake lying wholly within Canadian territory, being exceeded in size only by Great Bear Lake. It is on the great northern inland water system which extends to the Arctic Ocean. The Slave River flows into it from the south. Slave Lake has a length to its headwaters of over 220 miles and is ranked with the great rivers of the world. It is navigable for a great part of this distance with only one break at the rapids of Slave River, Fort Smith. The distance to the great lake is 1,000 miles above sea level and the MacKenzie River in its course to the Arctic has a fall of that amount, this fall being in the main fairly uniform. The Topographical Survey Department of the Interior, Ottawa, has issued a report on Great Slave Lake and including the Northern Arctic. This area of the lake is largely full of islands and peninsulas and extends to the site of Fort Reliance at the mouth of Leckhart River. Several navigation channels are in use and these are shown. This map is one of a series of maps of the Great Slave Lake Navigation channels. They are printed on scales of four and six miles to one inch and include the water route from Fort Smith to the Arctic besides several other localities and the direct navigation route. A list of the names of the islands and their prices may be obtained from the Department of the Interior, Ottawa.

In general, wealthy overweight people have been visiting those European Spas whose waters are recognized for their medicinal value. The formula of Kruschen represents the ingredients of the natural water of the famous German Spas. These Spas combat the cause of fat by assisting the internal organs to expel—to throw off each day these waste products and poisons which, if allowed to accumulate, will be contrary to the body's customary fat-free tissue.

"I am very fat—I came to my self to have the benefit of Kruschen Salts and now I am quite slender. I am 50 years old and people take notice of me more than of myself. The formula of Kruschen represents the ingredients of the natural water of the famous German Spas. These Spas combat the cause of fat by assisting the internal organs to expel—to throw off each day these waste products and poisons which, if allowed to accumulate, will be contrary to the body's customary fat-free tissue.

"I am very fat—I came to my self to have the benefit of Kruschen Salts and now I am quite slender. I am 50 years old and people take notice of me more than of myself. You can take it from me that every word of this is true. I have lost 100 pounds since I began to eat Kruschen Salts. They are delicious, taste good, they stay with your weight in gold."—(Mrs.) A. H.

In general, wealthy overweight people have been visiting those European Spas whose waters are recognized for their medicinal value. The formula of Kruschen represents the ingredients of the natural water of the famous German Spas. THE OPEN ROAD

Suppose you came suddenly upon two roads. One straight, well-trodden—the other thin and twisting off into undergrowth. If you didn't want to arrive at any place in particular, you might choose the latter. But not otherwise.

Before you, as a buyer, run two roads. One is the road of knowledge of an advertised product. Thousands use it. There is no mystery about it, no doubting, nothing hidden. It leads the way definitely to flour, floor wax, clothing and food stuffs that will give you satisfaction. When you use an advertisement, you use an open road.

When you don't use advertisements, you go the doubtful road. You have only hazy knowledge of the product ahead. No trademark or name to depend upon guides you. The result may or may not be worth the effort. You don't know.

Read the advertisements. Anything widely advertised—breakfast food, hamper, hair tonic—has proved itself good by advertising.

Advertisements put you on the open road to satisfaction

GLEICHEN, ALBERTA

Town & District

The annual ratemakers and school board meeting will take place in the Community Hall, Friday evening, January 27th, at the hour of 8 p.m. There will be a lot of squawking about taxes there will likely be a large attendance.

A snow storm sprung Saturday afternoon and kept raging until the early hours of Sunday morning. Since then the weather has been clear but cold. Some thermometers registered ten below Sunday.

Mrs. W. Jensen, who resided with her husband on a farm a half mile south of Standard died Saturday. The funeral took place from the Danish Lutheran Church Standard, with Rev. Kaderup, of Tilley conducting the service. Mrs. Jensen leaves a husband and four children, the oldest being 21 years of age. The day after Mrs. Jensen may have four months son, George, died. He died a short time after being taken to the hospital.

An item in the "Calgary Herald" under the heading of "Thirty Years ago" stated a dance was put on in Gleichen the proceeds of which were to be used to beautify the cemetery. Evidently in those early days dances were used to raise money here.

The Gleichen delegates attending the U. F. A. convention at Calgary are Frank Daw and Mrs. J. McArthur.

The Mandanistik hockey boys are putting on a dance at the Mandanistik Hall, Friday, January 27. The boys hope that there will be a big crowd present for they promise one all a good time.

W. Harrison states that owing to the lack of snow this winter he has been unable to get the slide in satisfactory working condition for the children to slide upon.

The Riverdale Hawks defeated the Gunnars at the local arena 2-0 one evening last week. This is the first time in three years the Gunnars have been defeated at home. It was a dandy game. The Hawks showed superior finish especially on the defensive side, while they cut near the net. Both goals were well earned, the shots being taken from close in when Roberts had no chance to save. On two other occasions the Hawks almost scored but Roberts got them. During the game, Roberts got the ball. Hawks net had the goalie outstretched them. In the third the Gunnars sent up everybody except the goalie and gave the Hawks a busy time for a few minutes. So good was the Hawks' defense in this period that the gunners had only eleven saves chalked against him while Roberts had six.

Once more the Gunners were defeated by a Calgary team, the Altonians, 1-0 was the score. Also note 14 saves were chalked up against the Altonians while Roberts had only 12 saved against the Hawks. They never once made a bombing pass on Gleichen ice and practically all the shots were taken inside the blue line but Lady Luck smiled all evening on the Altonians.

The Calgary boys made the only counter shortly after the start of the game in a scrimage. After that the Gunners took the offensive and for minutes at a time controlled the play inside their own blue line. In the second the Gleichen boys nailed down opponents to their own end and peppered them with shots from right, left and in front. Occasionaly the Calgary boys would break away but could not repeat it. Gleichen blue line then the play would surge back and become furious around the Altonian goal. At times the entire Gunner lineup, with the exception of Roberts, would be up the ice. The third was an exact duplication of the second. The Gunners sometimes broke through but were met plus good luck was wide awash and shots he didn't see just naturally hit him in the right spot.

At times feeling ran a little high but taking into consideration the intensity of the Gunners attack it is remarkable that the game was so clean.

The Altonians were completely outclassed. Only one penalty was called out by Referee George Ellingson which went to Tom Johnston in the third.

The Gleichen Flour Mill

Now is a good time to get a supply of flour for next summer. Flour milled within the next two or three months will be at its best three or four months later. In the meantime you will have the bran and shorts for the horses, milk cows and pigs during the winter months when they most need this class of food.

The Gleichen Flour Mill would prefer to have all patrons pay for the grinding and take all the wheat when磨 makes it will exchange other flour, bran or shorts for wheat at prevailing prices.

NOTICE

The annual meeting of the raters and electors of the Gleichen School District No. 103 will be held in the Gleichen Community Hall on Friday evening, January 27th, 1933, immediately after the adjournment of the annual meeting of the electors of the Town of Gleichen, which meeting will begin at 8 p.m.

Dated at Gleichen, Alberta, this 21st day of January 1933.

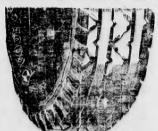

M. MURRAY,
44
Secretary, Treasurer.

Crickets have their ears on their knees, but it took a scientist to find it out. If girls were built like that everybody would know.

You'd Want GOOD YEAR

tires even if they cost dollars more than other tires—

BUT THEY DON'T!

We know folks who would gladly pay a premium for Goodyear Tires. But they don't have to. Goodyear costs no more than any other tires you would put on your car.

The extra quality in Goodyear is extra value for you. Their extra mileage, extra safety, extra stamina are a bonus—for which you pay nothing.

Get this extra something! Use Goodyear! Let us show you!
